Art Unit: 2664

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 29 is rejected under 35 U.S.C. 102(e) as being anticipated by Hjalmtysson et al (newly cited, U.S. Pat. # 6,128,305).

Hjalmtysson et al disclose a method and system which provide for a network using lightweight signaling for establishing connections incorporating the step of forwarding a connection request datagram from a first host to a second host through a virtual host (SETUP of fig. 1); forwarding an accept message from the second host to the first host through the virtual host, the accept message being flagged as a virtual circuit establishment signal (CONNECT of fig. 1); establishing a full duplex virtual circuit between the first host and the second host through the virtual host (The signaling of SETUP and CONNECT constitute the full duplex (the applicant in the instant application discloses full duplex in the last para. Of page 5 of the specification); and forwarding a confirmation message from the first host to the second host over the virtual circuit (CONNECT ACK of fig. 1).

3. Claims 16-22,28,30-33 are allowed.

4. Applicant's arguments with respect to claim 29 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
